Unicis Onboarding Training

Welcome to Unicis! Our onboarding training is mandatory for all employees and contractors. It is designed to ensure you are well-equipped with the knowledge and understanding of our company values, security protocols, and essential operational procedures. The training covers key areas such as governance, risk, and compliance practices, as well as cybersecurity and privacy principles.

For each section, you are required to thoroughly read the content and click the “Confirm” or “Done” icon to acknowledge that you have completed and understood the material. This ensures that everyone is aligned with Unicis' standards and expectations.
