Welcome to Unicis Handbook

The Unicis Handbook is the most accurate guide for how we work and run our company. This handbook is open to the world and everyone is welcome to contribute. You can change this page by clicking the edit link. A request will be made for someone inside the company to review the changes you suggested.

Company

Get to know our company vision, goal and mission, as well as what problem we are trying to solve and what kind of solution we provide.

Company

Communications

This is a place where we talk about what every team member needs to know to work well at Unicis.

Leadership

Products

This page covers what all contributors to the open-source community and Unicians should know in order to contribute to the core product.

Products

Why open-source

Here, we discuss why we chose to go with the open-core business model.

Open source

Development

We introduce you to the Software Development Life Cycle (SDLC) and how we build the products at Unicis.

Development

Security and Compliance

In this section, we explain how Unicis handles data privacy, cybersecurity, and compliance.

Trust Center

Operations

In the operations section, we elaborate on tools and applications used internally at Unicis and how to use them.

Operations

Recruiting

See all the open positions at Unicis.

Open positions

Onboarding Training

Mandatory onboarding training for employees and contractors. Access only to employees and contractors.

Unicis Onboarding
