@NAME@ (@USER@) - Private Space

This namespace *@TARGETPRIVATENS@:** and it's content (pages, images, ...) is **reserved for your own usage** (only superusers can also access to it)...

- To create a page inside this private space, simply use the standard link syntax without any namespace :

```
[[example page 1]]
[[example 2|My example page 2]]
```

- To create a sub-namespace, simply indicate the new page's full position :

```
[[@TARGETPRIVATENS@:<sub-namespace_to_create>:example 3]]
```

Feel free to remove this paragraph (beside the title)...
Now, write something! 😬
